

Label IML (In Mold Labelling)

by veriplast solutions

IML

→ Optimum solutions for your IML labels

A technical label for improved productivity

Perfect flatness over total area

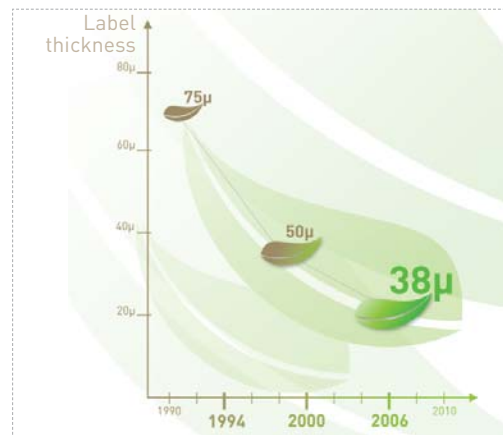

Precise and regular label cutting

Excellent static management

Eco - environmentally friendly solutions

- Thickness up to 38 microns (optimisation of transport costs and loading time during injection moulding)
- Weight effective solutions (Extra Slim label)
- 100% recyclable plastic material
- An annual carbon dioxide emission report on our business unit with constant improvement objectives

Solutions that meet up with your expectations

We are organised to meet your most stringent requirements:

- Overall IML mastery (label manufacture and injection moulding process) for improved understanding of your pre-requisites
- Innovative solutions to optimise graphic costs: Hexachrome printing, optimisation of number of colours

Applications

- Food trays and other injection moulded products: Fat products, cheeses, ice creams, etc.
- Bottles: Household cleaners, washing liquids, etc.
- A wide range of plastic packaging and products
